

## FINGER PICKS AND LETTERS FOR RIGHT HAND FINGERS

Banjo tablature uses the letter M to represent the right hand middle finger. The letter I is used to represent the right hand index finger. The letter T represents the right hand thumb. You can purchase plastic or metal banjo finger picks at most music retail stores, or on E-BAY. The letters M – I – T are also used below or above the number tablature System to tell you which finger of your right hand should be used to pick the note numbered on the tablature lines. A few people do not use finger picks but they use their finger nails much like a classical guitar player does in order to pluck the strings.
